Introductioni

About the Author.....i

Chapter 1 - Therapy and Treatment 1

 Research shows a walk in the park improves attention in children with ADHD 1

 ADHD medications do not cause genetic damage in children..... 3

 VYVANSE provided behavior, inattention and math test score improvements in children with ADHD..... 4

 M.I.N.D. Institute researchers call for fragile X testing throughout the lifespan.... 5

 Children with high risk for a sleep-related breathing disorder are more likely to have anxiety 7

 UC Davis researchers discover new mechanism for attentional control in the human brain 8

 PET imaging focuses on medication's purported ability to improve mental performance 9

 Innovative program focuses on improved care for children with ADHD 10

 Journal Sleep: Methylphenidate can have sleep benefits in adults with ADHD... 11

 Cocaine's effects on brain metabolism may contribute to abuse..... 12

Chapter 2 - Diagnostics and Screening.....73

 Novel imaging technique reveals brain abnormalities that may play key role in ADHD..... 73

 Investigators at Soonchunhyang University, Department of Psychiatry publish new data on mental health 74

 Research in the area of attention deficit hyperactivity disorder in children reported from University of Central Florida, Department of Psychology..... 75

 Michigan State University, Department of Psychology publishes research in attention deficit hyperactivity disorder in children 76

 Researchers from Kaohsiung Medical University report details of new studies and findings in the area of attention deficit hyperactivity disorder in children 77

 Studies from D. Purper-Ouakil and colleagues provide new data on attention deficit hyperactivity disorder in children..... 77

 Reports from University of California advance knowledge in attention deficit hyperactivity disorder in adolescents 78

 Scientists at University of Gothenburg, Sahlgrenska Academy publish new data on attention deficit hyperactivity disorder 79

 Study data from L. Tamam and colleagues update understanding of attention deficit hyperactivity disorder 80

 Research from University of Ghent broadens understanding of behavior disorders 81

 New findings from University of Minnesota in the area of depression published 81

 More Articles 82 - 83

Chapter 3 - Epidemiology84

New pediatric in children study findings recently were reported by researchers at Eli Lilly and Company..... 84

Researchers from University Medical Center, Department of Paediatrics discuss findings in psychiatry..... 85

New findings from University of California, Semel Institute in the area of attention deficit hyperactivity disorder in adolescents published 85

New findings in attention deficit hyperactivity disorder epidemiology described from Washington University, Department of Psychiatry 86

Findings from University of Notre Dame advance knowledge in mental health in adolescents 87

Studies from University of Minnesota, Department of Pediatrics reveal new findings on pediatric in children 88

Reports outline attention deficit hyperactivity disorder research from New York University 88

New findings reported from Chinese University of Hong Kong describe advances in depression 89

Reports from E. Sobanski and colleagues advance knowledge in attention deficit hyperactivity disorder 90

Research on anxiety disorders discussed by scientists at University of Verona ... 91

Chapter 4 - Genetics.....94

Did the gene for ADHD help our nomadic ancestors? 94

Children's diet not the main cause of ADHD 95

Researchers from University of Nottingham provide details of new studies and findings in the area of attention deficit hyperactivity disorder risk factors..... 95

Study data from King's College London update knowledge of life sciences 96

Research findings from Otto-von-Guericke University update understanding of attention deficit hyperactivity disorder in children 97

Data on attention deficit hyperactivity disorder described by researchers at King's College London 98

Data on attention deficit hyperactivity disorder therapy discussed by researchers at Emory University, Department of Psychology 98

Findings from National Public Health Institute provide new insights into attention deficit hyperactivity disorder therapy 99

Studies in the area of attention deficit hyperactivity disorder reported from Cardiff University, Department of Psychological Medicine 100

Findings in mental health reported from Cardiff University, Department of Psychological Medicine 101

Reports on personality disorders findings from University of Wurzburg provide new insights 101

More Articles 102 - 119

Chapter 5 - Risk and Prevention.....120

Report confirms increased risk of smoking, substance abuse in bipolar adolescents 120

ADHD appears to increase level of nicotine dependence in smokers..... 121

Adolescent girls with ADHD are at increased risk for eating disorders, study shows 122

Scientists at Massachusetts General Hospital, Department of Psychiatry release new data on attention deficit hyperactivity disorder risk factors 123

Research from University of Science and Technology yields new findings on attention deficit hyperactivity disorder in children 124

Reports from Harvard University describe recent advances in attention deficit hyperactivity disorder risk factors 124

New research on attention deficit hyperactivity disorder prevention from S.H. Kollins and co-authors summarized..... 125

Research results from INSERM update knowledge of attention deficit hyperactivity disorder quality of care 126

Research in the area of attention deficit hyperactivity disorder in children reported from L.M. Pelsser and colleagues..... 127

Studies from University of South Alabama further understanding of speech in children 127

Recent findings from University of Wisconsin highlight research in brain research 128

More Articles 129 - 169

Index..... 170
