

Table of Contents

Preface	i
Introduction	i
About the Author.....	i
Chapter 1 - Therapy and Treatment	1
Autistic mannerisms reduced by sensory treatment.....	1
New schizophrenia genes uncovered	2
Drug reverses mental retardation caused by genetic disorder	3
Virtual reality teaches autistic children street crossing.....	4
Financial struggles plague families of children with autism.....	5
Data on autism therapy described by Y. Asahi et al	6
Research from University of Minnesota, Division of Neuroscience yields new findings on autism therapy.....	7
Research on autism described by M.F Casanova and colleagues	7
New self-injurious behavior prevention study findings have been reported by researchers at Louisiana State University, Department of Psychology.....	8
Reports from University of Cambridge describe recent advances in Asperger syndrome in children	9
New findings from University of Mississippi Medical Center, Department of Pediatrics in the area of pediatric in children published	9
More Articles	10 - 13
Chapter 2 - Asperger syndrome.....	14
Recent findings from E. Muller and co-authors highlight research in Asperger syndrome	14
New Asperger syndrome findings from T. Bennett and co-researchers published	14
Scientists at Macquarie University release new data on Asperger syndrome	15
Chapter 3 - Cell Biology.....	16
Researchers link early stem cell mutation to autism.....	16
Kids with autism may have gene that causes muscle weakness.....	17
New Research Shows One in 200 People Born with DNA Mutation That Can Lead to Devastating, Often Fatal Disease	17
New autism study findings have been reported from J. Melke et al	18
Chapter 4 - Diagnostics and Screening.....	20
Study shows California's autism increase not due to better counting, diagnosis ..	20
Study supports theory that rise in autism is related to changes in diagnosis.....	21
Mental disorders in parents linked to autism in children	23
Studies from University of Connecticut, Department of Psychology describe new findings in autism in children	23
Recent findings from Deakin University highlight research in autism in adolescents.....	24
Researchers from University of Texas, Psychology Department detail new studies and findings in the area of autism in children.....	24

Research results from A.H. Latif and colleagues update understanding of autism in children 25

New autism research from Louisiana State University discussed..... 25

Research results from K.M. Gray and colleagues update understanding of autism 26

Data from C.Y. Chen et al provide new insights into autism..... 26

Recent studies by B. Wright and co-authors add new data to autism findings 27

More Articles 28 - 32

Chapter 5 - Epidemiology33

Households with kids with autism likely to earn less 33

Removing thimerosal from vaccines did not reduce autism cases in California... 34

Study findings on autism in children are outlined in reports from University of Hong Kong..... 35

Studies conducted at College of New Jersey on autism recently published 36

Reports from Chiba University, Department of Psychology advance knowledge in autism epidemiology..... 36

New thoracic and cardiovascular surgery study findings have been published by R.E. Neufeld and colleagues 37

New premenstrual syndrome research has been reported by H. Baydi et al 38

Researchers at University of Texas have published new data on autism 38

Research from McLean Hospital in the area of autism described..... 39

New autism study findings recently were published by researchers at University of Michigan 39

New autism study findings have been reported by scientists at University of North Texas..... 40

More Articles 41 - 40

Chapter 6 - Genetics.....41

Middle Eastern families yield intriguing clues to autism..... 41

Middle Eastern families help scientists pinpoint autism genes..... 43

Rates of rare mutations soar 3 to 4 times higher in schizophrenia..... 44

Autism risk higher in people with gene variant 45

Researchers move 2 steps closer to understanding genetic underpinnings of autism 47

Novel chromosome abnormality appears to increase risk of autism..... 48

Chromosomal abnormalities play substantial role in autism 49

Recurrent genetic deletion linked to autism..... 50

The Montreal Children's Hospital of the MUHC begins search for causes of autism 51

Studies from Upstate Medical University have provided new data on autism in children 51

New autism genetics study findings recently were reported by researchers at Queen's University, Department of Psychiatry 52

More Articles 53 - 69

Chapter 7 - Immunology.....70
 Some cases of autism may be traced to the immune system of mothers during pregnancy..... 70
 Prenatal exposure to maternal antibodies linked to autistic behaviors in offspring 71
 Autism's origins: Mother's antibody production may affect fetal brain 73
 Study results from California Institute of Technology provide new insights into schizophrenia 74
 Scientists at University of Utah report research in autism 74

Chapter 8 - Neurology.....76
 Carnegie Mellon study identifies where thoughts of familiar objects occur inside the human brain 76
 'Faulty' brain connections may be responsible for social impairments in autism . 77
 Brain study suggests way to measure, treat autism..... 78
 Mice Could Provide Clues to Autistic Behaviors, Stanford Researcher Says 79
 Data on attention deficit hyperactivity disorder in adolescents described by researchers at Aachen University..... 80
 Researchers from Hamamatsu University publish new studies and findings in the area of autism..... 81
 Research from University of Illinois, Department of Psychiatry provide new insights into autism 82
 Findings from University of North Carolina, Research Center in autism reported83
 New autism genetics data have been reported by scientists at Aichi Human Service Center..... 83
 Study results from University Medical Center broaden understanding of autism in children 84
 New autism data have been reported by researchers at University of Medicine and Dentistry of New Jersey 85
 More Articles 86 - 97

Chapter 9 - Risk and Prevention.....98
 Accelerated head growth can predict autism before behavioral symptoms start .. 98
 Children with autism may learn from 'virtual peers' 99
 First autism prevention study launched by University of Washington 100
 Research conducted at Penn State University has provided new information about autism in children 101
 Research on autism in children detailed by scientists at University of Washington 101
 New findings from K. Williams and co-researchers in the area of autism described 102
 Research in the area of autism reported from Okayama University 102
 Research from University of Paris broadens understanding of autism 103
 Research from T. Mackay et al has provided new information about autism..... 104
 Researchers at Pennsylvania State University target autism..... 104
 Research results from S.H. Lee and co-authors update knowledge of behavior. 105

More Articles 106 - 107

Chapter 10 - Vaccines108

Babies excrete vaccine-mercury quicker than originally thought 108

Parents follow pediatrician advice on administering MMR vaccinations 109

Federal Members of Advisory Committee Block Vaccine-Autism Research, Defy
Wishes of Its Own Scientists, Autism Community, and Congress 110

Index141
